

VIDEO INTERCOM INTEGRATION WITH IP CCTV SURVEILLANCE SYSTEMS

With MEET it is possible to make the visitor call panel to behave as a CCTV camera, being able to record and monitor the video from third party devices.

COMMUNICATION

The panel sends a secondary RTSP video stream to the NVR constantly and independently of the call.

The panel sends an audio and video stream when a call to an indoor monitor is produced.

BENEFITS

- ◆ Integration costs are reduced due to the fact that the same IP infrastructure can be used, so that no additional wiring is required.

- ◆ It is possible to use the panel cameras as one more CCTV camera thanks to the RTSP protocol..
- ◆ The learning curve of the security staff is much faster and simple since the CCTV system will be the same.

- ◆ It is even possible to manage different communications using the same headset appliance, reverting into a more comfortable experience for the system operator.

INTEGRATION PROTOCOLS

- ◆ AUDIO CODECS : G.711, PCMU, PCMA
- ◆ VIDEO CODECS: H.264 VIDEO RESOLUTION : 1080 x 720p
- ◆ VIDEO STREAMING PROTOCOL: RTSP (Real Time Streaming Protocol)

WHY FERMAX?

FERMAX is a worldwide reference in the video intercom industry. The products have been installed in the most emblematic projects in the world. FERMAX Distribution network, which is present in more than 70 countries, will provide the best Support and assistance.
