CONTROL 4 INTEGRATION

SYSTEM INTEGRATION

It is possible to reduce costs on home automation projects by integrating the video intercom system with the home automation system in the following 2 ways.

VIDEO INTERCOM MONITOR as home automation as the main user interface to control home automation. This is achieved by installing C4 app into WIT monitor.

OUTDOOR VIDEO PANEL to call any C4 devices such as C4 smartphone app, C4 touchscreens,, etc. This is achieved by installing FERMAX MEET C4 Driver* in the controller.

FUNCTIONALITIES

APP CALL DIVERT ON SMARTPHONE

SMARTPHONE HOME AUTOMATION CONTROL

HOME AUTOMATION CONTROL FROM INDOOR MONITOR

ALARM RECEPTION ON MONITOR

INTERNAL MONITOR INTERCOM

IP CAMERA VISUALIZATION FROM MONITOR

BENEFITS

- ◆ Integration costs are decreased by using a single touch screen, the MEET indoor monitor, instead of 2 touch screens for home automation and video intercom.

- ◆ Solution aesthetic is improved since the amount of devices is minimized to 1 single intercom monitor.

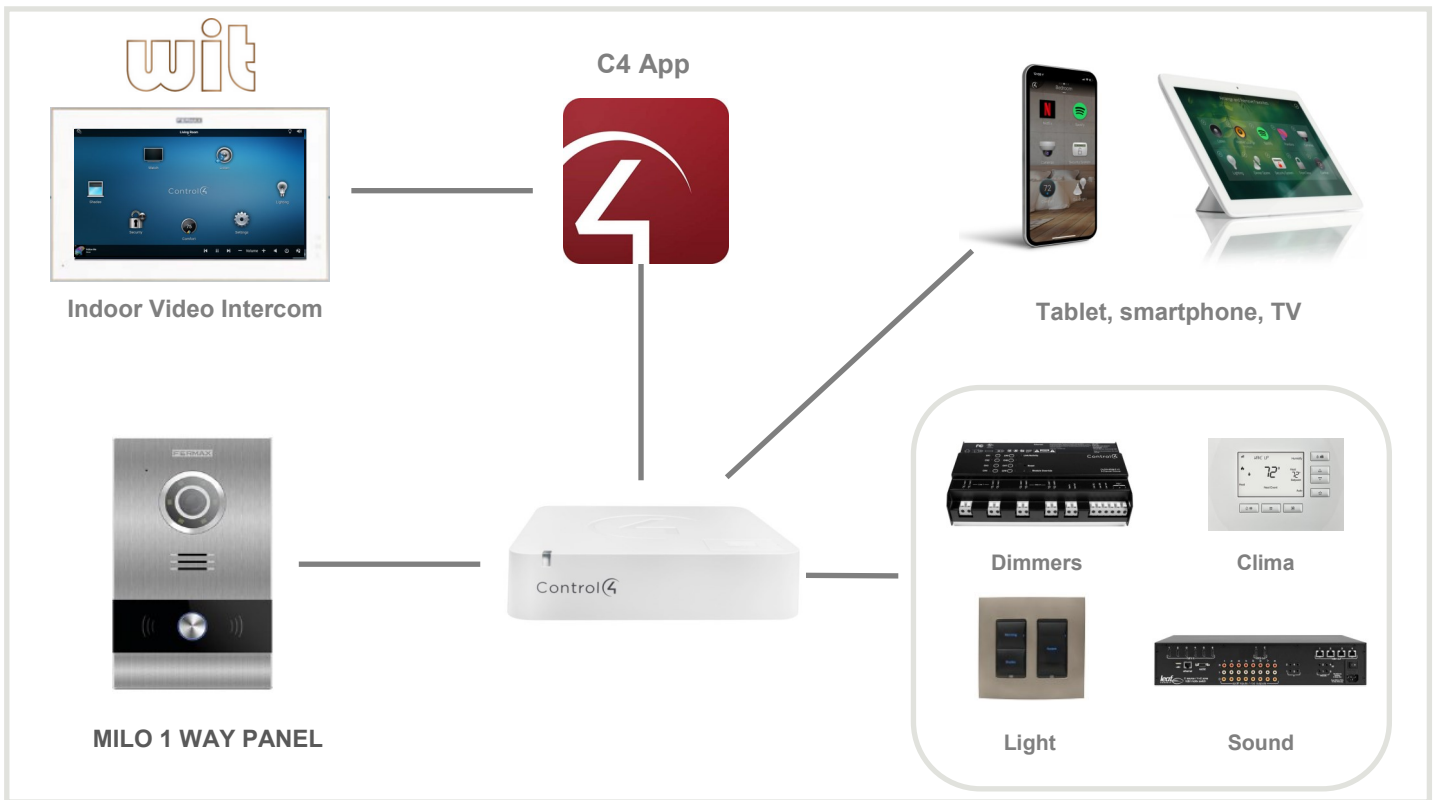

- ◆ Integration time and costs are dramatically reduced, due that there no SIP integration are required, so the Technical knowledge required to do the integration

- ◆ All specific residential video intercom functionalities are provided by FERMAX MEET system, which is designed to offer the best user experience for tenants and visitors.

- ◆ With the 10" WIT video monitor, building IP network and home local network are completely isolated thanks to its 2 RJx45 interfaces.

INTEGRATION ARCHITECTURE

In the same way the home automation can be controlled using smartphones or tablets, through the C4 App the WIT monitor can be used, since it is Android based. In this way we can provide a fixed and centralised control device in the installation.

WIT monitor can interact easily with C4 Controllers, which is the main link with the home automation devices at home.

WIT monitor is available in white and black colour and there is a smaller version of 7" in case it fits better into the project than the 10" version.

INSTALLATION REMARKS

The APP installation on the monitor is done by a certification process, where the APP to be installed on the monitor must be sent and be certified by FERMAX so it can be installed through IP to all monitors. (link to the app on the next page)

Interoperability is based exclusively on using C4 Driver License. C4 Driver License can be purchased separately (link to the driver on the next page)

WHY FERMAX?

FERMAX is a worldwide reference in the video intercom industry. The products have been installed in the most emblematic projects in the world. FERMAX Distribution network, which is present in more than 70 countries, will provide the best Support and assistance.
