VIDEO INTERCOM INTEGRATION WITH HOME AUTOMATION

It is possible to reduce costs in home automation projects by integrating the video intercom with the home automation system. **FERMAX and RTI** offer a wide portfolio of devices to choose from, what makes an ideal choice in any project technical or budget requirements.

The integration is based in visitor call panels that can call SIP compatible devices or user interface such **RTI Displays**. It is also possible to use the **FERMAX WIT** touch screen indoor intercoms to control the home automation by just installing an app and loading a license in **RTI processor** that will be used as an IP gateway to the home automation.

The mentioned possibilities can be combined with **MEET ME** Call Divert app, so the calls can be answered from the smartphone.

FUNCTIONALITIES

HOME AUTOMATION CONTROL AND VIDEO INTERCOM

FROM THE SAME TOUCH SCREEN PANEL

RTSP VIDEO STREAM CAN BE SENT IN PARALLEL TO A CCTV NVR RECORDER

REMOTE HOME AUTOMATION CONTROL BY CLOUD AND APP

SECONDARY DOOR OPENING

IP CAMERAS VISUALIZATION

BENEFITS

♦ It is possible to combine in the same project video intercom panels with different indoor monitors or touch panels at each apartment. As a matter of fact, it is possible to have **WIT** monitors in some apartments and **KA8** touch screens in other apartments.

♦ Integration and configuration time is reduced thanks to IP technology and its cabling system.

♦ Call divert function is something included by default in FERMAX WIT monitors **without additional costs**, or it can be purchased separately if there is no monitor (no recurrent fees). **Push notification based.**

♦ MEET ME app will receive the call in 8 smartphones per apartment that will ring at the same time.

INSTALLATION

RTI touch panels can receive calls from MEET outdoor panels directly. The outdoor panel will call using P2P SIP to **RTI** screens.
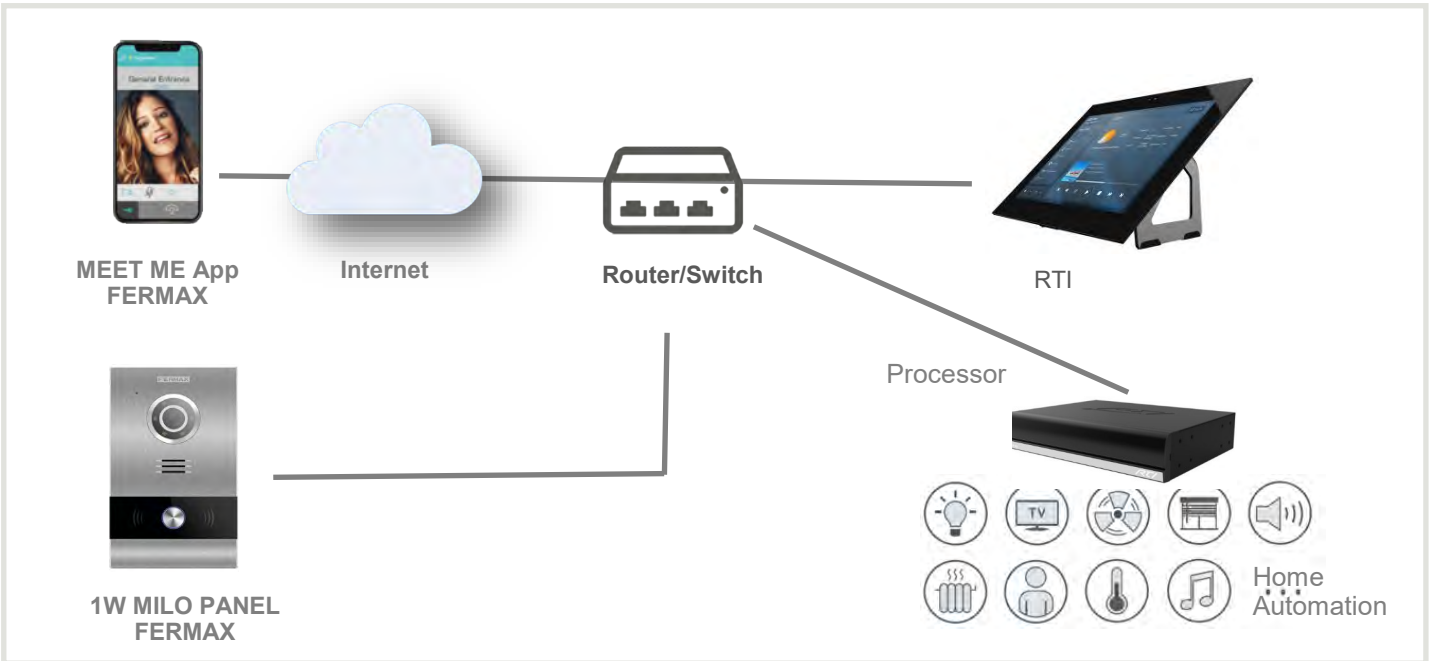

From **WIT** indoor monitors it is possible to control the home automation through **RTI processor**, but for this it will be necessary to install a license in **XP processor** as it is normally done using when adding mobile devices.

MEET ME call divert app from FERMAX, it is based in push notifications so that when a call is received what ensures call reception reliability. This is included with WIT monitor at no cost. It is also possible to acquire this function independently when no monitor is at home ordering the reference 1496 MEET ME CALL DIVERT LICENSE.
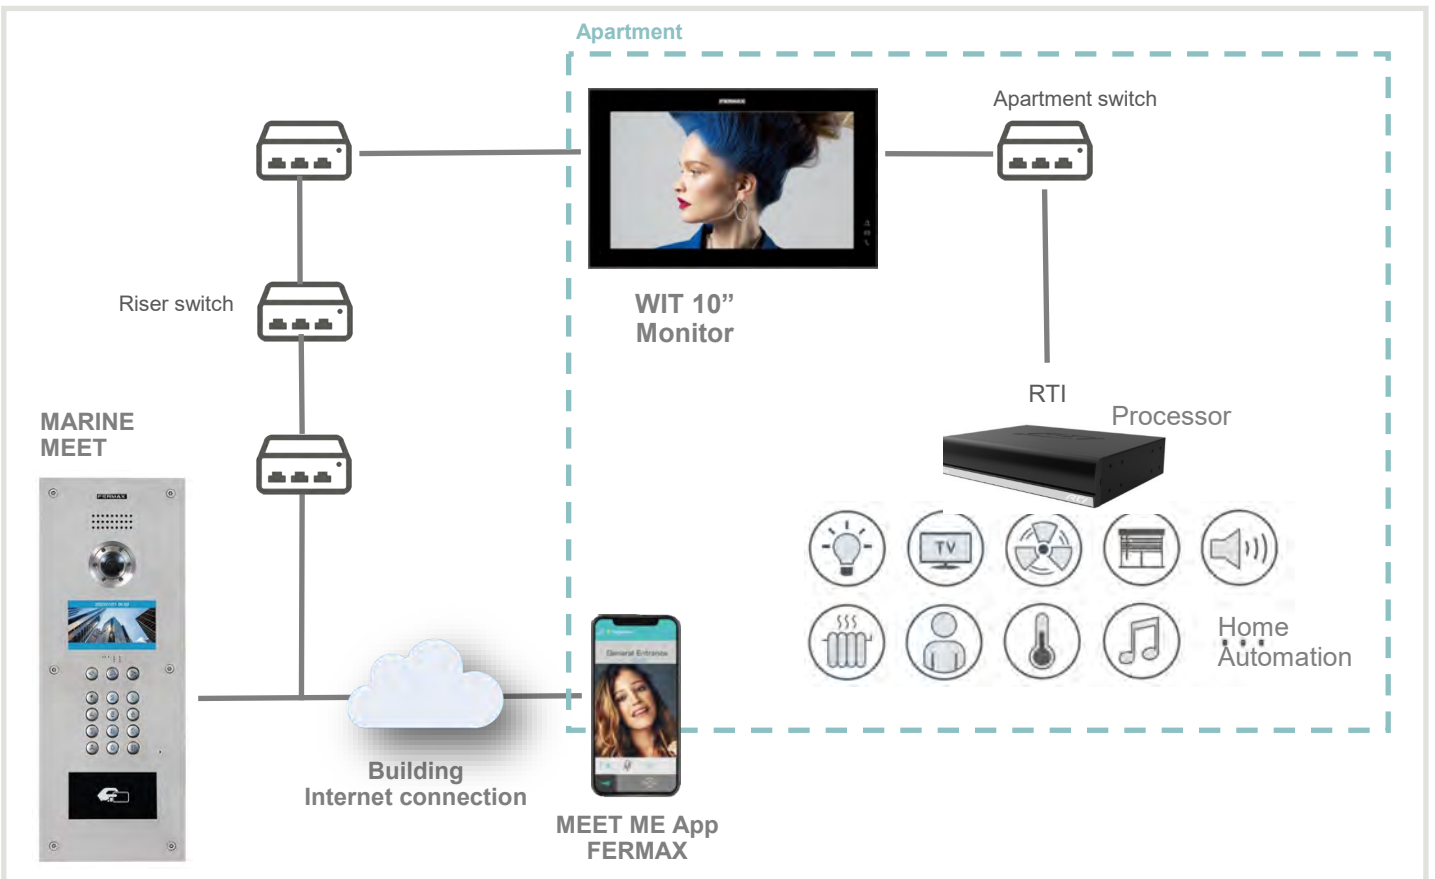

WHY FERMAX?

FERMAX is a worldwide reference in the video intercom industry. The products have been installed in the most emblematic projects in the world. FERMAX Distribution network, which is present in more than 70 countries, will provide the best Support and assistance.

Processor

1W MILO PANEL FERMAX

Home Automation

The outdoor panel sends the call to the RTI touch screen using SIP protocol (without server). In this way the touch panel can receive the call and show the video sent by the outdoor panel using RTSP protocol. Door can be opened by the touch panel.
