MEET IP INTERCOM AND LOXONE HOME AUTOMATION

Intercom

Home Automation

LOXONE AND MEET IP SYSTEM INTEGRATION

In the same way the home automation can be controlled through the LOXONE App using smartphones or tablets, the LOXONE App can be installed on the WIT indoor monitor, since it is Android 10 based. In this way we can provide a fixed and centralised, **always ready**, device in the installation.

WIT monitor can interact easily with LOXONE Mini Server, which is the main link with the home automation devices at home.

There are different models of WIT monitor. White and Black colour can be chosen. It is also possible to choose the 7", smaller version in case it fits better in reduced spaces, or 10" with double ethernet port.

It is possible to achieve an **optimal aesthetic solution** using a unique user interface, the video intercom indoor monitor. This **optimizes also the costs** since it is required just one single device to manage Home Automation and answer the doorphone calls.

In the same way Home Automation is managed from an smartphone, it is possible to receive the **doorphone video call** in the smartphone **MEET ME app without any extra cost**.

FUNCTIONALITIES

- HOME CONTROL FROM THE INDOOR VIDEO INTERCOM MONITOR
- DOORPHONE CALL DIVERT UP TO 8 SIMOULTANEOUS PHONES (WITHOUT EXTRA COSTS)
- OUTDOOR PANEL RTSP VIDEO STREAM OUTPUT TO BE RECORDED IN CCTV NVR DEVICE
- SECONDARY DOOR OPENING AND SECURE OPENING USING ADDITIONAL EXTERNAL RELAY
- CCTV CAMERA VISUALIZATION FROM THE APP

BENEFITS

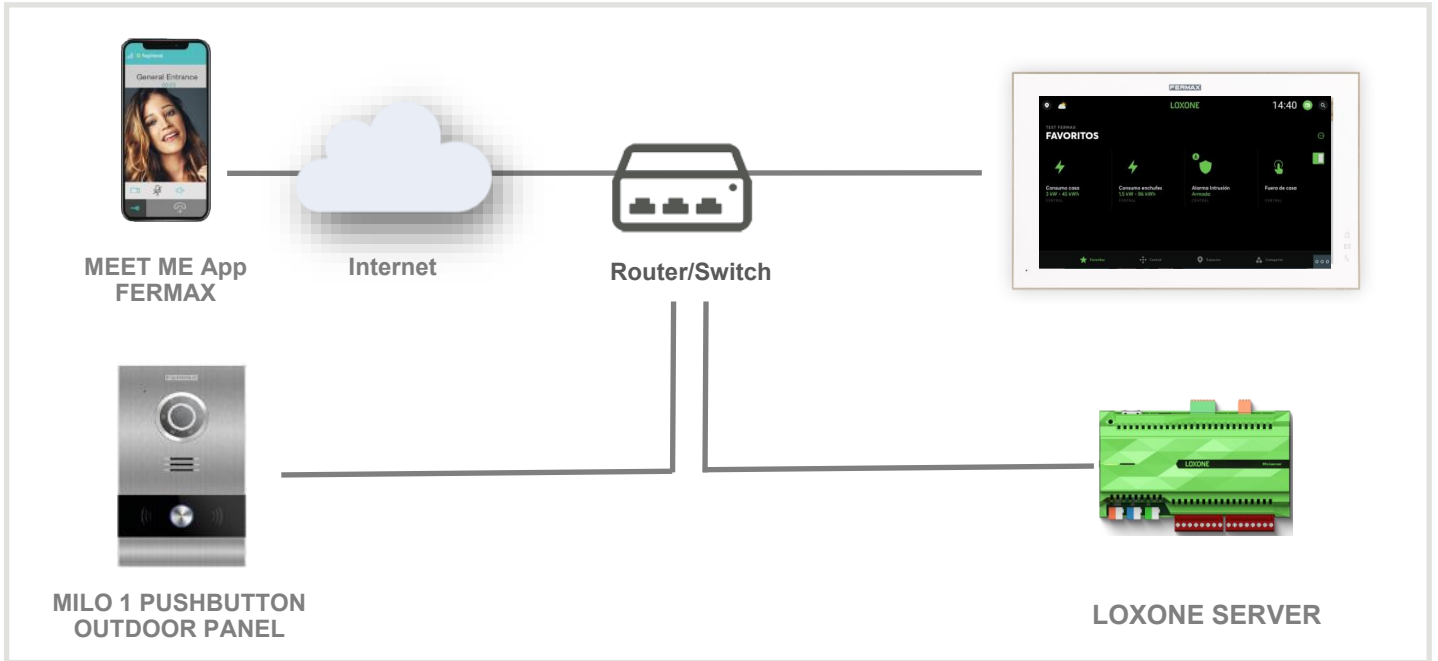

- ◆ Costs reduction thanks to the use of the doorphone touch screen as the main control device
- ◆ Simple integration based in apps installation on the indoor monitor and IP technology
- ◆ Single aesthetic solution integrated in one control device.

INSTALLATION

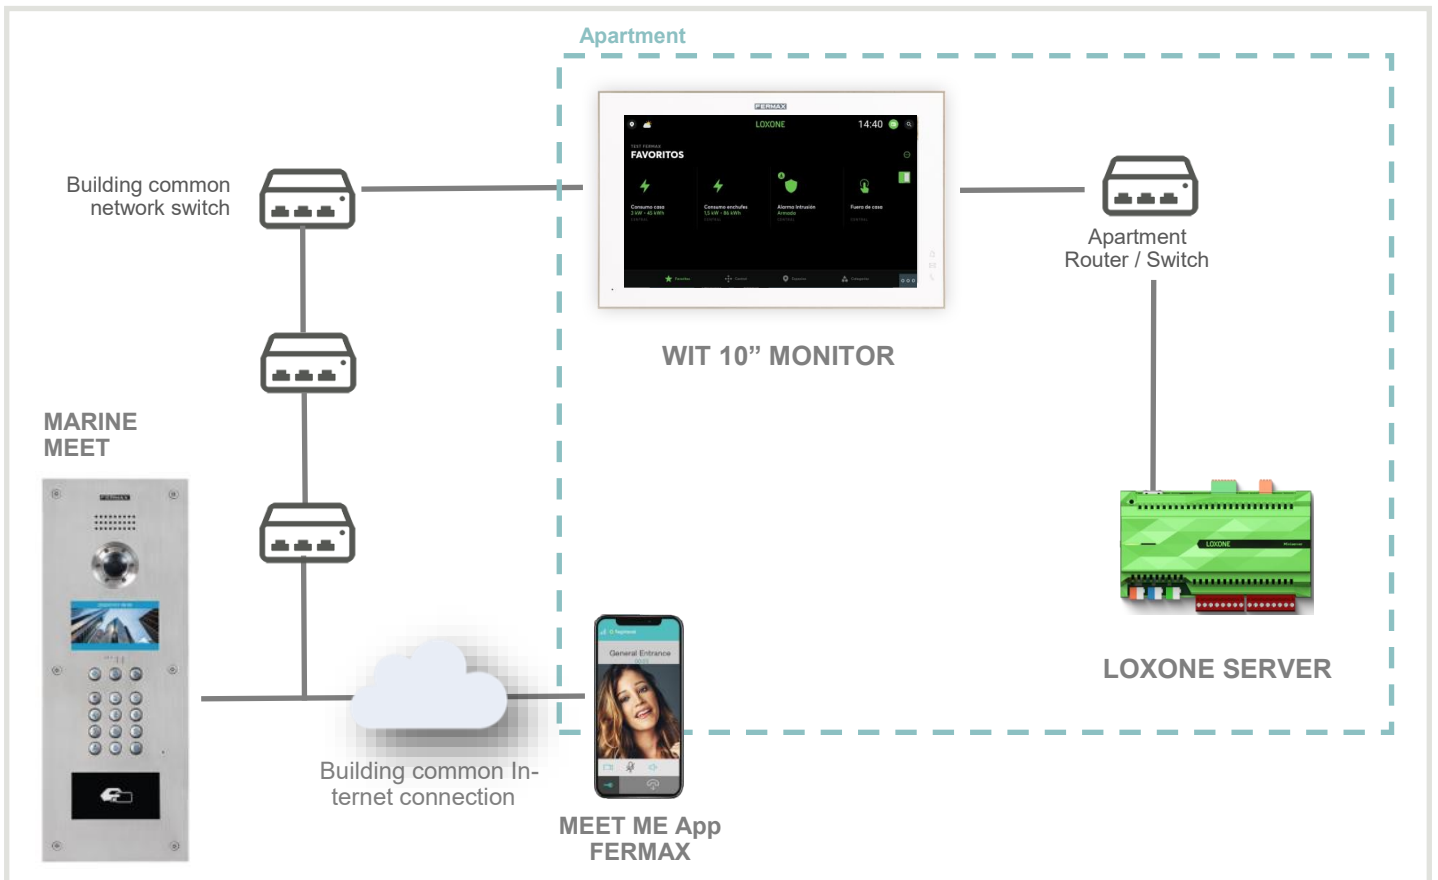

LOXONE Mini Server and WIT monitor are connected to the same wired Ethernet network so it is possible communicate the Mini Server from the WIT monitor. Depending on monitor type (7 or 10 inches), panel also shares this network (single house scenario) or is installed in a different network (building scenario) so network of each home is totally isolated from the others.

From the WIT monitor it is possible to interact with the Home Automation system using all the options from the LOXONE app installed on the touch screen. The monitor then can be used as visualization panel to check the system general status.

WIT MONITORS 10" OR 7" SOLUTION (Single house case study)

WIT MONITORS 10" SOLUTION (MDU building case study)
